Event Description

Continue the conversation at the HIMSS Clinical & Business Intelligence Community and Population Health reception!

This is an *invitation only* event to mix and mingle with your fellow HIMSS C&BI Community and population health colleagues. Come network with your peers; dig deeper into sharing best practices, pain points, and successes; and build up and out professional relationships that will help you on your journey to *turn data into action* for value-based care and improved population health.

Event Location: Theater section of the Value of Healthcare Pavilion

BACKGROUND – Focus of the [HIMSS C&BI Community](#)

Clinical and business intelligence (C&BI) is the aggregation, analysis, and use of clinical, financial, operational, and non-traditional data captured inside and out of the healthcare setting to directly inform decision-making. Leveraging the power of C&BI will improve our nation's entire healthcare system as well as the medical and economic wellness of patients.

HIMSS C&BI Community will help you leverage the power of C&BI to positively impact patient care delivery, health outcomes, and business operations through:

- ❖ Sharing practical guidance and unbiased information on how to harness these healthcare data
- ❖ Facilitating peer-to-peer networking, problem solving, solution sharing, and education
- ❖ Engaging with peers and fellow industry leaders

Our virtual learning sessions feature topics such as:

- ✓ Data aggregation and access through EDW, HIE, and cloud solutions
- ✓ Data management, validation, quality, and integration

- ✓ Descriptive, retrospective, predictive, and prescriptive analytics and modeling
- ✓ Governance – data and program
- ✓ Reporting, dashboards, and visualization techniques
- ✓ Population health management, including attribution and risk stratification
- ✓ Precision medicine and health
- ✓ Staffing and skills development
