#### Contrast Agents, Liability and Lawsuits – What Radiologists Need to Know

Results of a recent *Radiology* study on the legal risks inherent in contrast use were the focus of a Monday session. The study analyzed data from two major legal databases regarding published cases stemming from contrast injury.

## Contrast-Enhanced Mammography May Be an Option for Personalized Cancer Screening

For breast screening programs with limited access to MR imaging, or for patients who prefer to not undergo MR screening, contrast-enhanced mammography could offer a low-cost alternative with similar cancer detection rates.

## **Dual-Energy CT Offers Faster Diagnosis of Gallstones**

A technique using dual-energy CT shows promise in gallstone disease imaging and may reduce the need for further gastrointestinal imaging using US or MRI for patients with cholelithiasis or choledocholithiasis.

#### Sponsored Content from Samsung

When Minutes Matter, Mobility Is Critical for Point-of-Care CT In interventional, surgical and emergency settings, timely care is crucial—and access to high-quality CT imaging on the spot can help radiologists deliver fast and accurate diagnoses without skipping a beat in the workflow.

# Creation and Impact of a Multidisciplinary Green Radiology Leadership Team

Health care contributes over five percent of global greenhouse gas emissions—and medical imaging departments are one of the largest contributors, according to a Monday session that included a roadmap for forming a green radiology program.

#### Information Blocking Provision Represents Opportunity for Radiologists

A provision of the Cures Act that allows patients timely access to their electronic medical information—in some cases before their physicians—represents both a challenge and an opportunity for radiologists.

# **DL Models Show Bias in Knee Osteoarthritis Diagnosis**

Deep learning models are able to diagnose knee osteoarthritis with high accuracy, but can also exhibit biases based on sex and, to a lesser extent, race, according to a digital poster.

**Banner Size:** 620 x 100

Accepted file formats: .gif, .jpg, .png; animated gif can loop up to four times.

Max file size: 100K

Note: We require a hairline border around the banner.

Some email clients may not support animation and will only display the first frame of the banner.
